

SSPC CHAPTER PROGRAM

THE SOCIETY FOR PROTECTIVE COATINGS - NORTHERN CA / NORTHERN NV CHAPTER

The Northern California/Nevada Chapter of the SSPC
is proud to present:

“ASK THE PROS”

*A roundtable question and answer session of coating issues
facing our industry today.*

Thursday August 23, 2007 11:30 am to 1:30 pm
Zio Fraedo's Restaurant
611 Gregory Lane, Pleasant Hill, CA 94523

We invite you to join us for lunch and a spirited discussion of the problems facing all of us today. Our “Pros” will answer your questions, help you with your job site situation, shore up your specification, or assist you with any coatings related issue you have. Sample questions or situations may include:

- What are the allowable VOC limits in the Bay Area?
- When should I use de-humidification?
- How do I know which surface preparation standard to use?
- How do I get qualified contractors to bid my work?
- Should I use 3rd party inspection?
- Is galvanizing better than inorganic zinc?

Bring your questions and situations to the meeting and we'll do our best to sort things out. If you're shy, you can Email the questions in advance to Dan Zavesky (DZavesky@surewest.net) and we'll bring them up during the meeting. Since this is a roundtable, feel free to come at any time and leave at any time once we've helped you out. We think this will be a very informative and fun time. You'll get a chance to network with industry professionals as well as learn more about the SSPC. We look forward to seeing you there.
