AT THE
SAME TIME**

**THURSDAY
JUNE 19, 2008
MARE ISLAND
4:30 - 8:00**

INSPECTION OF COATINGS ON STEEL AND CONCRETE—June 19

We are going to set up and monitor eight different Inspection Stations that will help you build on your knowledge of how to properly identify and test the surface conditions on steel and concrete—which will, in turn, guide you in how to approach your job and properly inspect surfaces during and after application of coatings.

SSPC exists to improve the education of its members and to promote the coatings industry. The Chapter wants to build the camaraderie of its membership through useful, user-friendly programs.

The Chapter is interested in the education of our future workforce and will

be extending an invitation to students in the local Painter Apprenticeship Programs to attend this meeting as guests of SSPC.

FUN FACT: The list of bridges on the CALTRANS website is 43 pages long. There are approximately 38 bridges on each page, so that is 1,634 bridges.

The Inspection Stations will consist of:

- **AMBIENT CONDITIONS**
- **MEASURING SURFACE PROFILE**
- **SURFACE CLEANLINESS:**
 - **VISUAL STANDARDS**
 - **CHEMICAL & CHLORIDES**
- **DFT GAUGES FOR STEEL**
- **ULTRASONIC DFT & WFT GAUGES FOR CONCRETE**
- **DESTRUCTIVE TESTING & ADHESION GAUGES**
- **LOW AND HIGH VOLTAGE HOLIDAY DETECTORS**

REGISTRATION FORM

Attendee Names:

1)
2)
3)
4)

Name _____

Company _____

Address _____

Phone _____

Method of Payment

Check enclosed

Will Pay at Door

COST:

\$35.00 PER PERSON

(Apprentices No Charge)

TOTAL DUE: \$ _____
