FUN AT THE SAME  
TIME**

**THURSDAY  
JUNE 18, 2009  
MARE ISLAND  
4:30 - 8:00**

# THE SHOP COATING PROCESS FROM FABRICATION TO FIELD

We are going to set up and monitor eight different Inspection Stations that will help you build your knowledge of proper fabrication and how it relates to surface preparation, coating and inspection. SSPC's goal is to demonstrate the Do's and Don'ts of fabrication as related to surface preparation and coating process.

SSPC exists to improve the education of its members and to promote the coatings industry. The Chapter wants to build the camaraderie of its membership through useful, user-friendly programs.

The Chapter is interested in the education of our future workforce and will be extending an invitation to students in the local Painter Apprenticeship Programs to attend this meeting as guests of SSPC.

**FUN FACTS:** The Golden Gate Bridge color is orange vermillion, also called international orange. In 1965 the original paint was removed because of corrosion and replaced with inorganic zinc silicate primer and an acrylic emulsion top coat, a project that took 30 years. Today, 38 painters work on the bridge, along with 17 ironworkers who replace corroding steel and rivets.

## The Stations will consist of:

- **SPECIFICATIONS AND LIBATIONS**
- **SURFACE PREPARATION**
- **ZINC VS. GALVANIZED ARCHITECTURAL FINISHES**
- **INACCESSABLE AREAS**
- **WELDING ISSUES**
- **FLAME CUT EDGES**
- **SHARP EDGES**
- **HANDLING & TRANSPORTATION**
- **CONTACT AND HOLDBACK AREAS**
- **SHOP INSPECTION / 3RD PARTY**
