COATING INSPECTIONS: The Age of Digital Technology

THURSDAY, JUNE 21, 2012
Mare Island, Vallejo
4:30—8:00 P.M.

COATING INSPECTIONS: The Age of Digital Technology

JUNE 21, 2012—Mare Island, Vallejo, CA

We are going to set up and monitor several different inspection stations. These stations will help you build on your knowledge of how to properly identify and test the surface conditions on steel, using the latest inspection instruments and technology. This in turn, will guide you in how to approach your job and properly inspect surfaces during and after the application of coatings.

SSPC exists to improve the education of its members and to promote the coatings industry. The Chapter wants to build the camaraderie of its membership through useful, user-friendly programs.

The Chapter is interested in the education of our future workforce and has extended an invitation to students in the local Painter Apprenticeship Programs to attend this meeting as guests of SSPC.

Mare Island is the oldest Naval Base on the West Coast dating back to 1850

THE INSPECTION CRITERIA WILL INCLUDE, but not be limited to, THE FOLLOWING:

- **Ambient Conditions**
- **Measuring Surface Profile**
- **Surface Cleanliness:**
 - **Visual Standards**
 - **Chemical & Chlorides**
 - **Hedon SSM Soluble Salt Meter**
- **DFT Gauges for Steel**
- **Destructive Testing and Adhesion gauges**
- **Low and High Voltage Holiday Detectors**

"BE OUR GUEST POLICY"

SSPC strives to bring together: applicators, owners, engineers, manufacturers, architects for sharing expertise and education in the industry. The Chapter invites Facility Owners, Engineers and Architects to be "our guest" at this event—no charge.
